Question: 86

As you assist a Hispanic client during her meal time, which food selections do you expect to be incorporated into a diet that would represent culturally sensitive care?

- A. Beans and tortillas.
- B. Cheese and olive oils.
- C. Vegetables and rice.
- D. Red meat and potatoes.

Answer: A

Food preferences for Hispanic clients often include beans and tortillas. These foods are a staple in many Hispanic diets.

Question: 87

After emptying urine from the bedpan of a client whose urinary output is being monitored, what should you do next?

- A. Wash hands thoroughly.
- B. Apply a clean pair of gloves.
- C. Report the amount of urine to the nurse.
- D. Document the amount and characteristic of urine in the chart.

Answer: A

After any procedure is completed, the medical assistant must wash her hands to prevent transmission of microorganism. The application of gloves is only necessary if the medical assistant must attend to another item of personal care before documenting urinary output; even so, hands should be washed first. Crucial information is reported to the nurse, not routine intake and output.

Question: 88

Which muscle is responsible for unlocking the kneecap while walking?

- A. Fibularis brevis
- B. Plantaris
- C. Biceps femoris
- D. Sartorius

Answer: B

The muscle responsible for unlocking the knee while walking is the plantaris muscle. It also assists in plantarflexion of the ankle and flexion of the knee. It is often used as a source for tendons when grafting is necessary.

Question: 89

The physician has ordered to bladder training for a client with an indwelling catheter. The goal of bladder training is to

- A. Remove the catheter.
- B. Allow the person to walk to the bathroom.
- C. Gain control of urination.
- D. Void every 3 to 4 hours.

Answer: C

Bladder training programs help some persons with urinary incontinence. Control of urination is the goal. Bladder control promotes comfort and quality of life. You assist with bladder training as directed by the nurse and the care plan.

Question: 90

Which of the following measure(s) is /are included in the care plan of clients with fecal incontinence?
I.Help with elimination after meals and every 2 to 3 hours.
II.Provide good skin care after every elimination.
III.Assist the nurse in the insertion of a suppository as ordered by the physician.
IV.Apply of incontinence products.
V.Eliminate foods that are gas-forming (cabbage, cauliflower, radish, beans, onions, and cucumbers).

- A. II and IV

- B. I, II, IV, and V
- C. All of the above.
- D. II only

Answer: B

Fecal incontinence is the inability to control the passage of feces and gas through the anus. The client may need bowel training, help with elimination after meals and every 2 to 3 hours, incontinence products to keep garments and linens clean, good skin care, and avoidance of gas-forming foods.

Question: 91

Which of the following interventions promotes client safety?

- A. Asses the client's ability to ambulate and transfer from a bed to a chair.
- B. Demonstrate the signal system to the client.
- C. Check to see that the client is wearing his identification band.
- D. All of the above.

Answer: D

Safety is a basic need. You must protect clients from harm. Safety measures include: The client is checked often. Frequent checks are made on clients with poor judgment or memory. The client is taught how to use the signal light. The signal light is always within the person's reach.

Question: 92

Which of the following factors contributes to constipation?

- A. Excessive exercise
- B. High fiber diet
- C. No regular daily time for defecation
- D. Microbes in food and water

Answer: C

Constipation is the passage of a hard, dry stool. The patient usually strains to have a bowel movement. Common causes include a low-fiber diet, ignoring the urge to defecate, not having a regular daily time for defecation, decreased fluid intake, inactivity, drugs, aging, and certain diseases. Microbes in food and water are attributed to diarrhea.

Killexams.com is a leading online platform specializing in high-quality certification exam preparation. Offering a robust suite of tools, including MCQs, practice tests, and advanced test engines, Killexams.com empowers candidates to excel in their certification exams. Discover the key features that make Killexams.com the go-to choice for exam success.

Exam Questions:

Killexams.com provides exam questions that are experienced in test centers. These questions are updated regularly to ensure they are up-to-date and relevant to the latest exam syllabus. By studying these questions, candidates can familiarize themselves with the content and format of the real exam.

Exam MCQs:

Killexams.com offers exam MCQs in PDF format. These questions contain a comprehensive collection of questions and answers that cover the exam topics. By using these MCQs, candidate can enhance their knowledge and improve their chances of success in the certification exam.

Practice Test:

Killexams.com provides practice test through their desktop test engine and online test engine. These practice tests simulate the real exam environment and help candidates assess their readiness for the actual exam. The practice test cover a wide range of questions and enable candidates to identify their strengths and weaknesses.

Guaranteed Success:

Killexams.com offers a success guarantee with the exam MCQs. Killexams claim that by using this materials, candidates will pass their exams on the first attempt or they will get refund for the purchase price. This guarantee provides assurance and confidence to individuals preparing for certification exam.

Updated Contents:

Killexams.com regularly updates its question bank of MCQs to ensure that they are current and reflect the latest changes in the exam syllabus. This helps candidates stay up-to-date with the exam content and increases their chances of success.
