IBM Maximo Asset Management V7.5 Infrastructure Implementation

<https://killexams.com/pass4sure/exam-detail/C2010-501>

QUESTION: 160

CORRECT TEXT

Which message will display during an IBM Maximo Asset Management V7.5 (Maximo) installation when a location is selected that contains an already installed Maximo V7.x environment?

- A. The installation cannot continue because an existing Maximo installation was found.
- B. The installation cannot continue because the deployment engine has been installed.
- C. A Maximo installation was found so the installation assumes an upgrade and proceeds.
- D. A Maximo installation was found so the installation will uninstall the existing installation and continue.

Answer: C

QUESTION: 161

Which tool can check the Maximo database and report common metadata errors?

- A. updatedb
- B. Install Validation
- C. Integrity Checker
- D. Prerequisite Verification

Answer: C

QUESTION: 162

A customer is having performance problems and needs to understand how to resolve these performance issues. Their environment runs a single Java Virtual Machine (JVM). How can clustering help with the performance issues?

- A. Clustering provides a means to spread some of the workload across multiple heap spaces.
- B. Clustering speeds garbage collection by having more garbage collectors to purge the application space.
- C. Clustering creates multiple TCP/IP ports for a single JVM to allow for more connections to the application.
- D. Clustering provides failover so that the failure of an overburdened application server can be met by a hot standby cluster member.

Answer: D

QUESTION: 163

When working with a hardware load balancer in a customer implementation, the hardware load balancer has been configured to point to a web server. What is the implication of this configuration?

- A. The hardware load balancer balances the user load completely.
- B. The hardware load balancer calculates and balances a percentage of the load.
- C. The hardware load balancer does nothing except add another layer of complication.
- D. The hardware load balancer balances the percentage of the load that the web server has been configured to present to it.

Answer: C

QUESTION: 164

CORRECT TEXT

When querying the MAXVARS table prior to server startup, which value should be displayed to confirm that the IBM Maximo Asset Management (Maximo) database was successfully created and configured?

- A V7500-721
- B. V7500-010
- C. V7500-000
- D. a null value

Answer: A

QUESTION: 165

The customer wants to implement standard attached documents in order to attach files to records in IBM Maximo Asset Management (Maximo). Which two areas may need to be updated to implement attached documents?

- A. the IBM HTTP Server
- B. the install.properties file
- C. Maximo System Properties

- D. the IBM HTTP Server plug-in
- E. IBM WebSphere Application Server or Oracle WebLogic Server JDBC resources

Answer: D, E

QUESTION: 166

What are the appropriate OS performance tools for analyzing server performance?

- A. Top on Linux
- B. Topas on Linux
- C. Perfstat on Linux
- D. Perfstat on Windows
- E. Perfmon on Windows

Answer: E

QUESTION: 167

During a new installation, what are the first two log files created in C:\IBM\SMP\maximo\tools\maximo\log?

- A. Cleandb and Maxinst
- B. Maxinst and Updatedb
- C. Updatedb and Configdb
- D. Maxinst and Reportlabelloader

Answer: B
