# C2090-623

*IBM Cognos Analytics Administrator V11*

**QUESTION:** 54

In a LifeCycle Manager Project, a user can create either a Benchmark task or a Comparison task. Which statement is INCORRECT when describing the application of Benchmark tasks?

- A. Benchmark tasks can be used as a benchmark test for any LifeCycle Manager Project.
- B. Benchmark tasks can be used to create a benchmark test to run Compatible Query Mode (CQM) reports as Dynamic Query (DQ) reports.
- C. When creating a Benchmark task, the administrator can choose whether to validate reports before they are run, and whether to run the reports in Dynamic Query Mode (DQM).
- D. To use a previously run Benchmark, select a previously created Benchmark task for the benchmark source and the target Cognos server that you want to compare to the benchmark.

**Answer:** C

**QUESTION:** 55

A report author gets the following error message:

“An error has occurred. Please contact your administrator. The complete error has been logged by CAF with SecureErrorID:2004-05-25-15:44:11.296-#9.”

How can the administrator get the complete error message?

- A. Open the cogerror.log file using a text editor.
- B. Open the cogserver.log file using a text editor.
- C. Run the user report errors audit report from the samples Audit package.
- D. Run the user session details audit report from the samples Audit package.

**Answer:** B

**Explanation:**

To find out about the actual error though an administrator with file access to the server log (cogserver.log) will need to search that log for the SecureErrorID given in the on-screen message.

**QUESTION: 56**

An administrator wants to control server workload by putting routing rules in place. Which components can be used?

- A. a package and/or group or role
- B. a package and/or a server group
- C. a group or role and/or a server group
- D. a package and/or group or role and/or a server group

**Answer: D**

**Explanation:**

A routing rule determines, based on user, group, or package, which server group you wish to handle a user request. There are four routing set rules in Cognos Business Intelligence.

**QUESTION: 57**

An administrator wants to ensure that a datasource can be referenced when creating data modules in the IBM Cognos Analytics Portal (New > Data module). What must be done to accomplish this?

- A. Add the datasource to the list of supported datasources in IBM Cognos Configuration.
- B. Configure the datasource in IBM Cognos Transformer so that it can communicate with the portal.
- C. In the web-based modeling tool itself, specify the 'Create Data Modules' access permission for the datasource.
- D. On the Connection tab of the datasource properties, ensure that the 'Allow web-based modeling' check box is selected.

**Answer: D**

**Explanation:**

Problem(Abstract): Datasource connections not listed in Data server by default Symptom: We can see the datasource in the Admin console but not in the list of data servers. Cause: This is default behavior. Resolving the problem Go to the Administrative Console

-> Configuration -> Set properties -> Connections tab. On the bottom, you will see "Data source capabilities"

Inside that, check the box which says "Allow web-based modeling" Once you check this, the datasource would be present as data server.

**QUESTION: 58**

An administrator needs to address an environment that is not running optimally and conduct an architecture review. Which performance attributes should be considered?

- A. capacity, scalability, availability
- B. gateways, application servers, Content Manager
- C. IBM Cognos implementation, capacity, infrastructure
- D. infrastructure, gateways, application servers, scalability

**Answer: C**

**Explanation:**

Conduct an architecture review to assess the physical architecture and software installation.

**QUESTION: 59**

An administrator is tuning the Caching services to improve Dynamic cube report performance. At the same time, there is a need to control the memory usage and Clear Cache. How is this done?

- A. Control of the memory usage and scheduling of the Clear Cache is a default setup.
- B. In IBM Cognos Configuration under IBM Cognos Services/IBM Cognos select Query Service and select operation Clear Cache.
- C. In IBM Cognos Administration under System tab from the actions menu, select Query Service and enable the checkbox for Clear Cache.
- D. In IBM Cognos Administration under Configuration tab click Content Administration,

click the New Query task button and select Clear Cache.

**Answer:** B

**Explanation:**

To avoid using outdated data that might be stored in the cache, you can clear the cache. You might want to clear the cache manually if your data source metadata changes infrequently or if you want to clear the cache in between automatically scheduled cache clearing. When you clear the cache using the following steps, it clears everything in the cache.

Steps

1. Start IBM Cognos Connection.
2. In the upper-right corner, click Launch, IBM Cognos Administration.
3. On the Configuration tab, click Query Service Caching.
4. Select the server groups for cache clearing.
5. Click Clear cache. The status of the Clear cache command is displayed. If a cache is being used by one or more pending reports or queries, it is internally flagged as “stale” by this command and is automatically cleared as soon as this usage completes.
6. Click Close.

**QUESTION:** 60

An administrator is implementing security by managing and working with the Cognos namespace. Which statement is true?

- A. To gain access to IBM Cognos Analytics, users can log on to the Cognos namespace.
- B. Create domain users in the Cognos namespace to avoid cluttering the existing authentication provider.
- C. User-defined groups and roles must be created in a 3rd-party authentication provider and cannot be created in the Cognos namespace.
- D. Although the use of the predefined and built-in groups and roles within the Cognos namespace is optional, the Cognos namespace cannot be deleted.

**Answer:** D

**Explanation:**

The Cognos namespace includes predefined objects to help you quickly set up initial security. You use the predefined objects and other features of the Cognos namespace for ongoing security management. You can create groups and roles in the Cognos namespace. Initial access permissions are applied to all predefined objects. You can modify the permissions from the object properties.

# SAMPLE QUESTIONS

*These questions are for demo purpose only. **Full version is up to date and contains actual questions and answers.***

*Killexams.com is an online platform that offers a wide range of services related to certification exam preparation. The platform provides actual questions, exam dumps, and practice tests to help individuals prepare for various certification exams with confidence. Here are some key features and services offered by Killexams.com:*

**Actual Exam Questions:** *Killexams.com provides actual exam questions that are experienced in test centers. These questions are updated regularly to ensure they are up-to-date and relevant to the latest exam syllabus. By studying these actual questions, candidates can familiarize themselves with the content and format of the real exam.*

**Exam Dumps:** *Killexams.com offers exam dumps in PDF format. These dumps contain a comprehensive collection of questions and answers that cover the exam topics. By using these dumps, candidates can enhance their knowledge and improve their chances of success in the certification exam.*

**Practice Tests:** *Killexams.com provides practice tests through their desktop VCE exam simulator and online test engine. These practice tests simulate the real exam environment and help candidates assess their readiness for the actual exam. The practice tests cover a wide range of questions and enable candidates to identify their strengths and weaknesses.*

**Guaranteed Success:** *Killexams.com offers a success guarantee with their exam dumps. They claim that by using their materials, candidates will pass their exams on the first attempt or they will refund the purchase price. This guarantee provides assurance and confidence to individuals preparing for certification exams.*

**Updated Content:** *Killexams.com regularly updates its question bank and exam dumps to ensure that they are current and reflect the latest changes in the exam syllabus. This helps candidates stay up-to-date with the exam content and increases their chances of success.*

**Technical Support:** *Killexams.com provides free 24x7 technical support to assist candidates with any queries or issues they may encounter while using their services. Their certified experts are available to provide guidance and help candidates throughout their exam preparation journey.*
