Question: 176

----- is a risk response where an organization decides to initiate actions to prevent any risk from taking place.

- A. Transfer
- B. Avoidance
- C. Mitigation
- D. Acceptance

Answer: C

Explanation:

Mitigation is the risk response where an organization lowers or reduces the chance of risk but does not prevent all risk from occurring. Avoidance is the risk response where all risk is removed.

Question: 177

----- are directions, guidance, and provide goals for an organization.

- A. Procedures
- B. Policies
- C. Agendas
- D. Manuals

Answer: B

Explanation:

Policies are general guidelines for an organization. Procedures are specific steps or actions. Agendas and manuals are where the guidelines are either documented or noted.

Question: 178

With new advancements in CSP technologies, you don't need to worry about storing sensitive sufficient for what?

- A. Application scanning
- B. Regulatory requirements
- C. Confidentiality
- D. Integrity

Answer: B

Explanation:

CSPs do offer tools that can meet most if not all the regulatory requirements your organization may require. However, compliance is similar to the shared responsibility model. You will need to take some ownership of compliance.

Question: 179

An organization that does business internationally needs to take into consideration data sovereignty laws on data stored in: (Choose all that apply.)

- A. The nation where the data is stored
- B. The nationality of the user the data is about
- C. The language that the data is stored in
- D. The location of the organization that stores the data

Answer: A,B,D

Explanation:

Organizations that do business internationally and store data about users and transactions that originate around the globe must consider three criteria: Where the data is physically stored. The nationality of the users for whom the organization is storing data

A. The location in which the organization is doing business.

Question: 180

In the event of competing local, state, federal, and international regulatory requirements, which regulations should an organization follow?

- A. Local
- B. State
- C. Federal
- D. International

Answer: C

Explanation:

Particularly in the US, federal laws preempt all other regulations. However, most nation states have similar rules due to sovereignty laws.

Question: 181

Your organization is in negotiations with a federal contractor that also deals with sensitive information from the federal government. Which federal regulation will apply in this scenario?

- A. FERPA
- B. MPAA
- C. FISMA
- D. NIST

Answer: C

Explanation:

The Federal Information Security Management Act (FISMA) is the federal regulation that deals with sensitive information security for federal agencies. FERPA is a federal law that protects the privacy of student education records. Motion Picture Association of America (MPAA) is the association that provides best practices guidance and control frameworks to help major studio partners and vendors design infrastructure and solutions to ensure the security of digital film assets. National Institute of Standards and Technology (NIST) is a part of the US Commerce Department that maintains and promotes guidelines and measurement standards.

Question: 182

You have been tasked with designing an FIPS 140-2 compliant application. Which technology are you most concerned with?

- A. User identity and passwords
- B. Encryption
- C. Mac versus PC
- D. Authorization

Answer: B

Explanation:

FIPS is a cryptographic standard for encryption. The other answers may use encryption in some fashion, but they are not rated for FIPS compliance.

Question: 183

HIPAA, GLBA, PCI DSS, and FINRA are all examples of based standards.

- A. Organizational
- B. Federal
- C. Industry
- D. International

Answer: C**Explanation:**

All the examples are standards that are industry specific. HIPAA is healthcare, GLBA is financial, PCI DSS is credit care, and FINRA is financial.
