Question: 216

When configuring a switch, which CLI mode only supports limited show commands?

- A. EXEC
- B. Maintenance
- C. Configuration
- D. EXEC Privilege

Answer: D

Explanation:

When configuring a switch, the EXEC Privilege mode, also known as Privileged EXEC mode, only supports limited show commands. This mode provides elevated privileges for executing certain privileged operations and commands on the switch. It allows the user to perform tasks such as viewing system information, running diagnostic commands, and managing system configuration. However, it does not provide access to all show commands and configuration options available in the Configuration mode. To access the full range of show commands and make configuration changes, the user would need to enter the Configuration mode.
