QUESTION: 63

Which network port is used by default for the BSM Connector user interface?

- A. 21212
- B. 30000
- C. 80
- D. 443

Answer: B

QUESTION: 64

When can User Engagement be configured?

- A. only when installing the database
- B. only when running the configuration wizard for the first time
- C. during the software installation
- D. at or after initial configuration

Answer: B

QUESTION: 65

What is the main difference between Population and Federation integration types?

- A. With Federation, RTSM controls the data. With Population, the source of the data still retains control of the data.
- B. With Population, RTSM controls the data. With Federation, the source of the data still retains control of the data.
- C. Federation cannot extend the scope of existing Topology Query Language. Population can only be used if a remote repository supports Federation.
- D. Population does not need to track changes made by RTSM at the CI level. Federation cannot be configured in actual state.

Answer: A

QUESTION: 66
